

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The homepage hero's vague copy and competing CTAs dilute the primary conversion mechanism of guiding visitors to shop, while the hidden free shipping threshold and lack of social proof further erode trust and clarity, causing visitors to hesitate or abandon the path to purchase.

#	Finding	Severity	Effort	PXL
1	Competing primary CTAs The hero presents two equally prominent CTAs, 'SHOP MEN' and 'SHOP WOMEN', splitting user focus and delaying...	Urgent	Medium	5/10
2	Vague hero copy The hero headline 'Wildly Comfortable. Super Natural.' is abstract and doesn't directly address the visitor's...	Urgent	Low	5/10
3	No social proof in hero The hero lacks any trust signals (reviews, ratings, or customer count), so first-time visitors may doubt...	Urgent	Medium	5/10
4	Free shipping threshold hidden The homepage hero promotes 'Wildly Comfortable. Super Natural.' but does not mention the \$100 free shipping...	Urgent	Medium	5/10
5	Single-field email capture The homepage email capture asks only for an email address, which is low-friction but lacks a value...	High	Medium	5/10
6	Mega-menu choice overload The mega-menu presents 20+ nav items with multiple sub-levels, risking choice overload and decision paralysis...	High	Medium	5/10
7	Heavy third-party script load The homepage loads 63 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
8	Path bypass via Get Notified The product page offers a 'Get Notified' CTA for an out-of-stock item, but the page also includes a 'Learn...	High	Medium	4/10
9	Controls without accessible names 41 of 79 buttons expose no text label, so screen readers and voice control cannot address them and the...	High	Low	2/10

#	Finding	Severity	Effort	PXL
10	Images missing alternative text 3 of 43 images carry no alt attribute, losing both assistive technology support and the image-search traffic...	Medium	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
